RE: Application for the Business Analyst Position

Human Resources
Bank of Namibia
P O Box 2882
Windhoek, Namibia

Dear Hiring Manager,

I'm applying for the Business Analyst position at the Bank of Namibia. I completed a Bachelor's degree in Computer Science (Software Development) at the Namibia University of Science and Technology (NUST), and through my studies and previous jobs, I've gained solid hands-on experience in systems development, analysis and support.

During my internship at the Office of the Prime Minister, I worked on web-based systems using React, TypeScript and Tailwind CSS. I was also involved in planning, discussing requirements, development, testing and system improvements. Being part of the full development process helped me understand how systems are built, maintained and improved over time.

As a Junior Web Developer and intern in other roles, I worked directly with clients to understand what they needed and then built solutions (Web Applications) based on that. This helped me improve how I communicate, listen carefully and turn business needs into working systems. I also worked with databases like MySQL, handled data cleaning using Python and tested applications before deployment to make sure everything worked properly.

I like working closely with people to understand what they really need. I'm easy to work with and I always try to deliver work that is clear, useful and on time. I communicate well with team members, ask questions when something is not clear and make sure everyone agrees on the goal before moving forward.

Thank you for taking the time to read my application. I would appreciate the opportunity to discuss how I can contribute as a Business Analyst at the Bank of Namibia.

Kind regards,
Tjitouua Mapoha
